

Perfection and Peace of Mind

SECURITY DOORS FROM **IMPREGNABLE SECURITY**

Security & great design from Impregnable Security.

Our range of security doors cover all needs, from very cheap simple doors with good performance, to the ultimate safety of bulletproof doors – all made to the highest standards that can be offered today.

Our doors are among the safest on the market – so much so, that if a thief wanted to break into your house, it would be easier to smash holes in the wall than trying to get through one of our doors.

Because we make all of our doors, we offer a standard range and custom doors with dimensions, decorations, lock types and finishes to suit you and your house.

Whatever you need in a security door you can rely on Impregnable Security to supply it.

Who are we?

We are the industry leader in the manufacturer, sale and installation of armoured doors.

We are the result of today's modern manufacturing technologies being applied to the best materials possible for the creation of security devices.

We are the best in security products regardless of your budget. Our same manufacturing skills and attention to detail go into every product regardless of how much or how little it costs. Even our lowest priced products are quarantined for security and safety. We guarantee every door we make.

We are your custom designed security specialists. All of our doors are made to your custom specifications.

We are Impregnable Security. We manufacture and test every product we sell. Our doors are not only the most burglar resistant doors available, but they are also heat, fire resistant and are designed to provide a very good sound barrier from the outside world.

When you buy an Impregnable Security product you'll know that you have received the highest quality products, technologies and professional service. We not only manufacture and sell the best, but we also make sure that they have been installed with the greatest attention to detail possible.

We are your first call for security whether you live in London, New York or, indeed, anywhere else in the world.

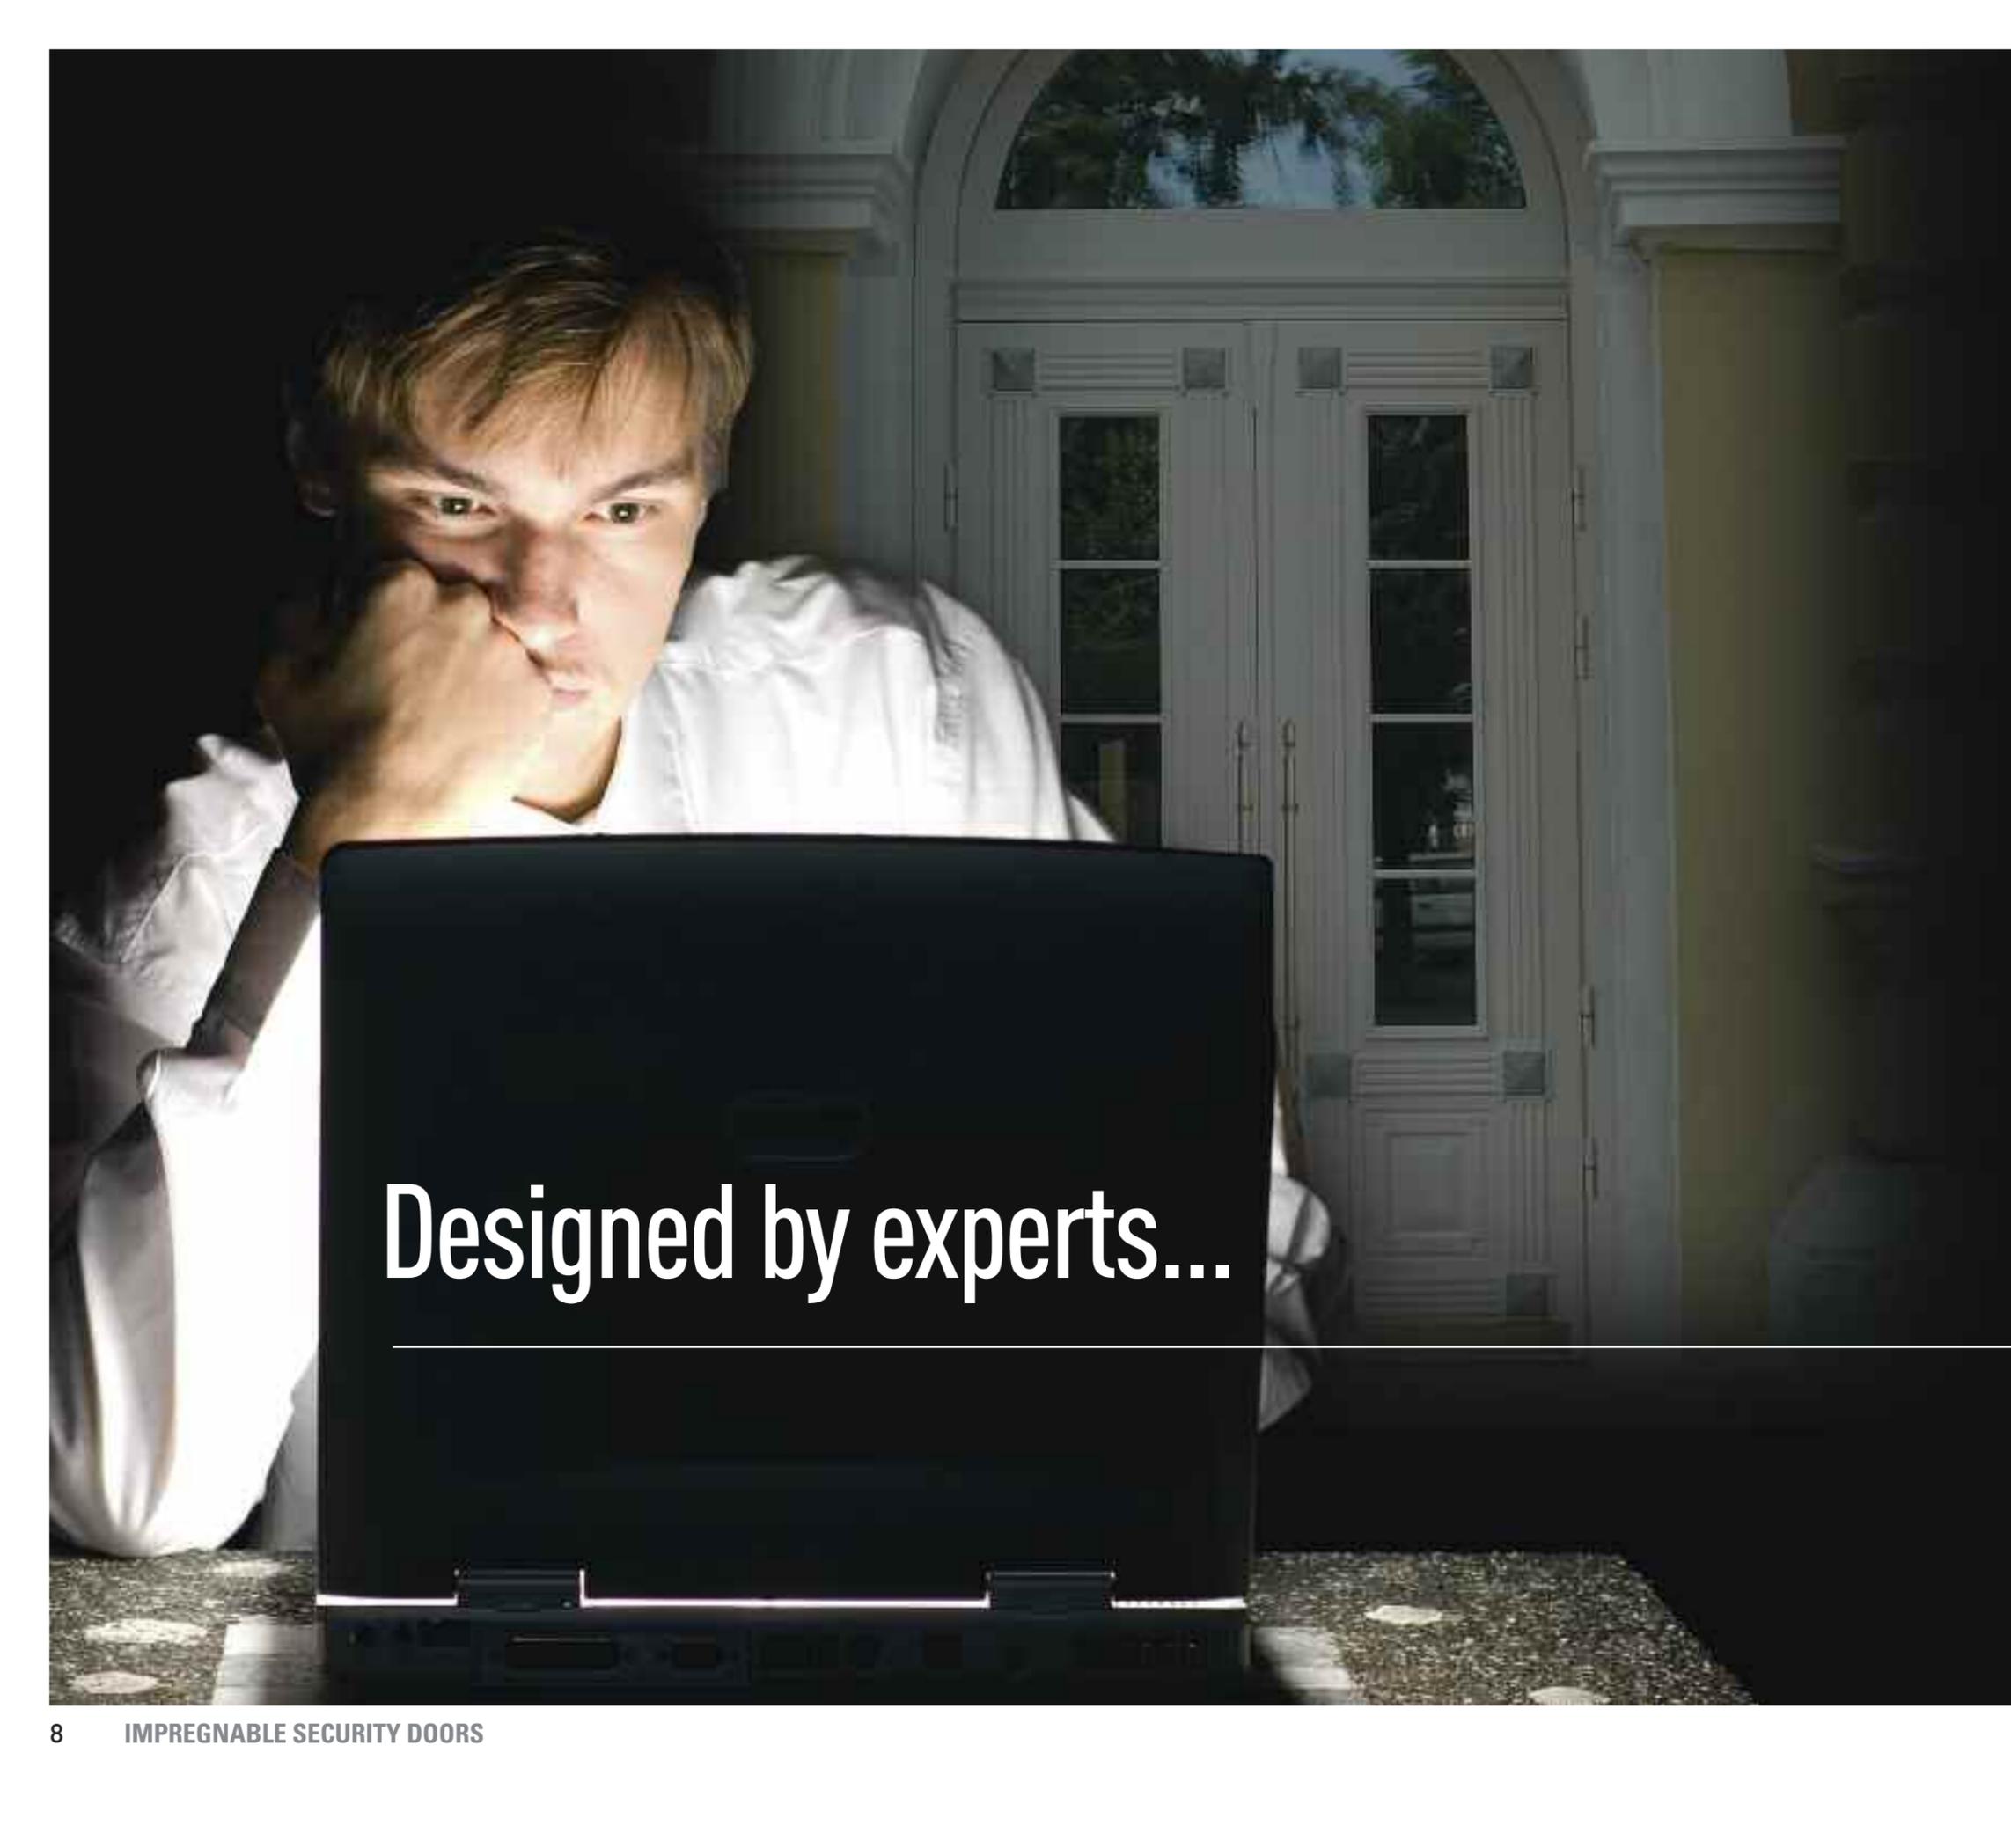

*perfection and
peace of mind*

Precision made.

Designed by experts...

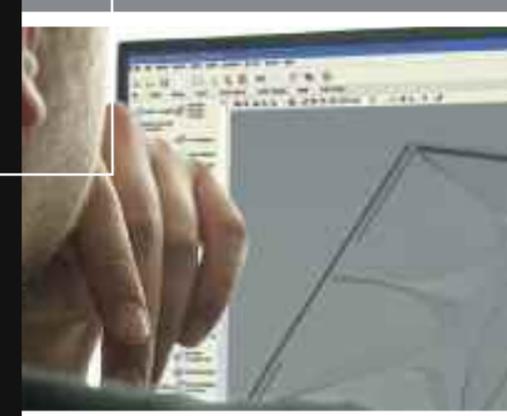

The door created by a scientist.

Remigijus Guobys, Impregnable Security's Production Director, is a MSc in mechanical engineering and is currently studying for PhD.

Impregnable Security doors use five of his inventions in manufacturing, each of which are covered by a European Patent.

Each door is designed and tested by computer simulation from the beginning of the design stage to the start of production.

The door components for each order are designed individually and prepared by our team of dedicated programmers.

...built by computer

All devices manufacturing door components are equipped with special computers, controlled by touchpad displays.

When each component or stage is finished, the operator relays to the computer that the work is complete and the component is conveyed to the next part of production.

Supervisors observe the stages, manufacturing the components for each particular order.

...for life's truly
precious things.

The production load is completely and accurately controlled so it accelerates the production process and ensures a speedy, ontime delivery.

Built tough.

Inner strength.

5 YEAR
GUARANTEE

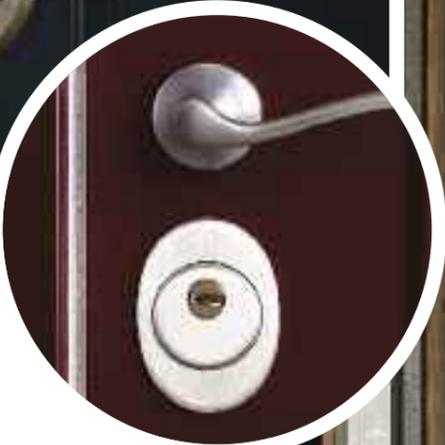

Impregnable Security Doors are built with beauty and integrity in every door.

All door models contain:

- Formed rectangular profiles in the door frames
- Specially formed metal door leafs
- Triple-hinged with supportive beds covered with chrome-plated finishing caps
- Four 16mm protective pins for hinges
- Dual insulation seals
- Durable inside and outside door finish
- Stainless steel thresholds ASSA plates in the door frames
- Lock is protected by drilling resistant plate

Exclusive access.

We supply over 40 styles and grades of main lock and over 20 styles of secondary lock. Something to suit everyone's security needs and pocket.

FREE ESTIMATES

Feel free to request a free estimate on your new security door.

Our professional staff will gladly provide you with an estimate on any of our products; they'll help you choose the perfect security door to match your particular needs.

They will patiently walk you through the selection process and explain all our products to you in a friendly manner that will ensure that you have chosen exactly the right model for your needs.

They will never ever pressure you in any way to make a decision.

We realise that your families security is one of the most important concerns you have and that you need to give the purchase of your security door serious consideration.

Contact us today to discuss what best suits your particular needs, and remember that we can install our products in your home anywhere in the world.

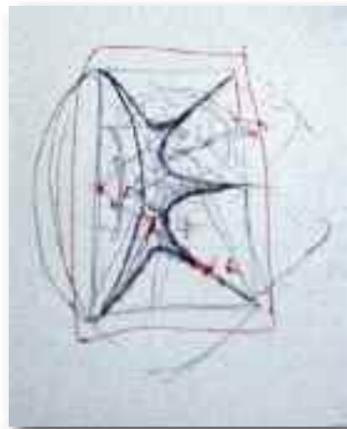

That personal touch.

We don't take chances with you and your family's safety. That's why Impregnable Security doors include the option of the latest and most sophisticated biometric entry systems for your added security.

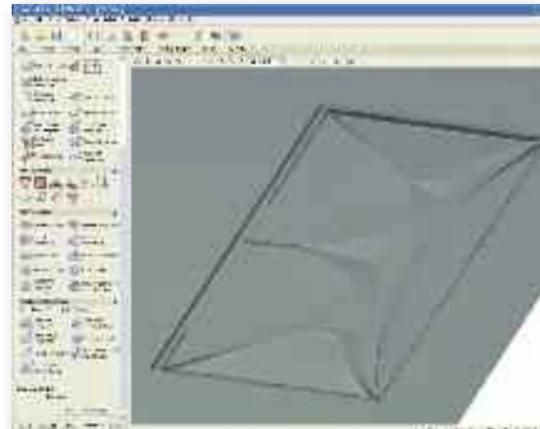

As unique as your fingerprint or the pattern of your iris, Impregnable Security doors make sure that only recognised individuals can enter.

Space age stuff.

From initial drawing...

...via state of the art software...

...to finished product.

Custom-made security doors.

Designed and built for you. Be it a heritage replication or a bespoke design and build, we utilise state of the art 3D design and Auto CAD technology to produce your drawings. We then bring your design to life within our state of the art manufacturing plant in Lithuania.

All shapes and designs are manufactured to exacting standards. You don't compromise on style; we never compromise on the quality or security. That's certified in German testing houses.

Our doors panels can be made using latest 3D design and Auto CAD technologies.

Optional remote lock

Perfect reproduction.

Security for listed buildings.

True to our philosophy & true to the original.

This door has remote controlled motorised locking system with an option to be operated by biometrical finger scanner. All this security is discretely achieved in a conservation area period property.

Installation of an Impregnable Security door to a Grade 1 listed building in Belgravia, London.

The design and build specification passed the full requirements of Westminster Council, Grosvenor Estates and English Heritage.

All in a days work for Impregnable Security.

This level 3 security installation meets all the Heritage regulations for a conservation area. ▼

► In order to gain entry to this house, burglars used brute force to smash the door to pieces. A local locksmith provided a temporary door whilst our technicians set to work to replicate this beautiful door within a conservation area.

Accurate measurements, photographs of neighbouring premises and physical samples of the old door were used to engineer an exact replica.

The process was completed utilising Farrow and Ball's classic colour pallet.

Satisfied customer: 1

Just a note to say how pleased we are with the new front door. The product meets our security needs and looks excellent. We were particularly pleased with the standard of installation carried out by Sergei and his colleague. As a result, if you wish to use this installation as a reference for prospective customers, we shall be glad to show them our installation.

Kind regards,
Graham and Gill Jeynes.

Beautiful to look at.

Enhance your home with an
Impregnable Security door.

Satisfied customer: 2

Dear Sir/madam

Today you installed my door and I just want to write to commend your services. Not only is the finish and product of a high quality, but the courtesy of you staff from the sales team to the fitters has been nothing but first class. The fitters were particularly conscientious.

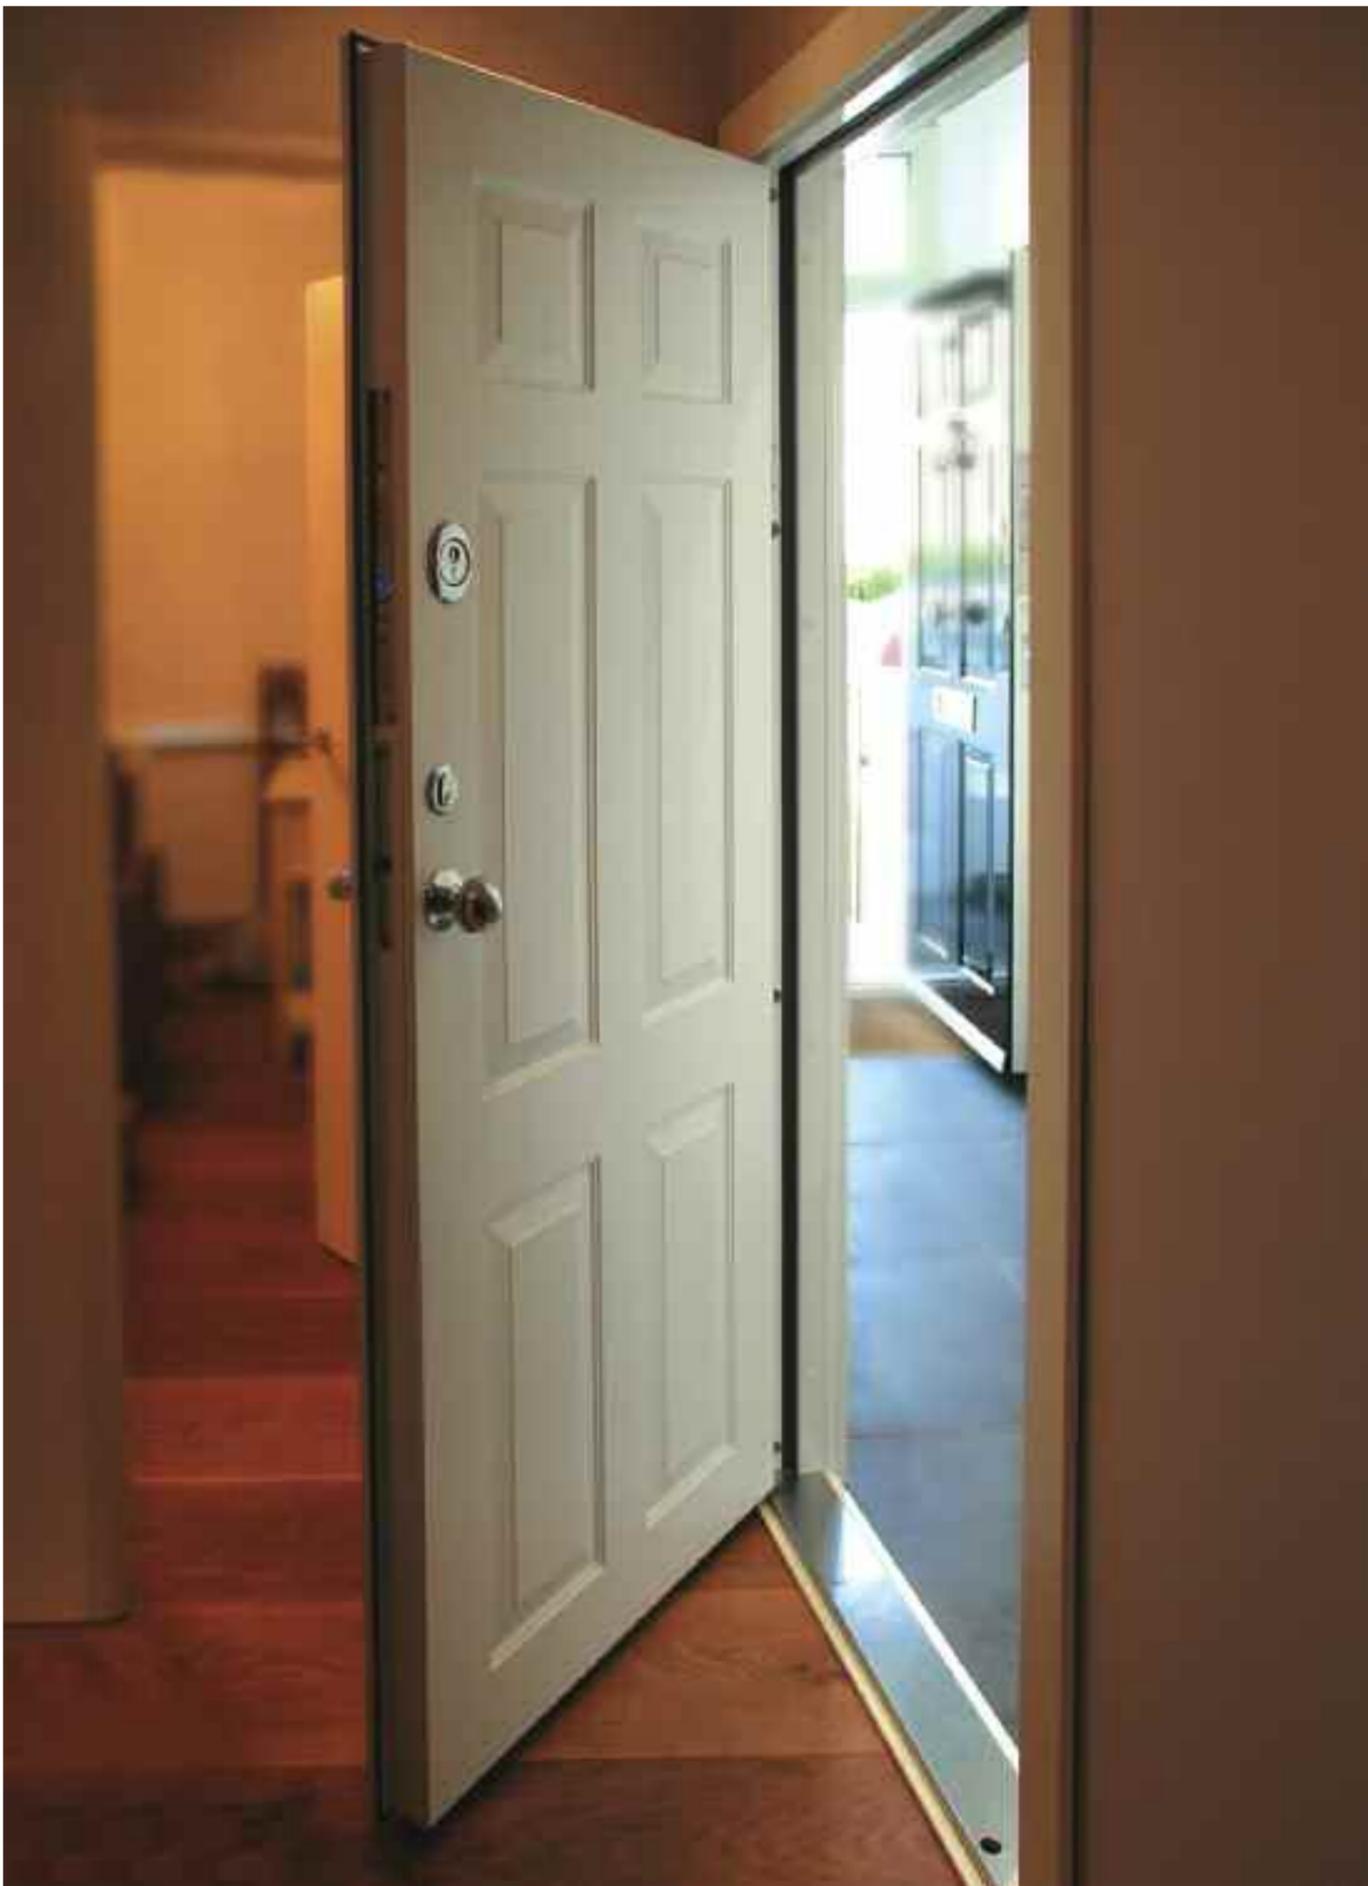

In my 14 years of being a police officer and having attended and investigated hundreds of burglaries, I take the security of my home very seriously and see the door I have purchased from you as a good investment which I am certain that I will recoup when I eventually come to sell. I have been to too many crime scenes where the door/locks have proved the weakest point of entry. In addition finding a contemporary door to match our home proved difficult but your bespoke service at reasonable prices compared to the market was refreshing.

As soon as I can afford to replace the utility door I will certainly come back to you to make a further purchase. In the meantime, I have no hesitation in recommending your services to others. The whole purchase has been worry free – thank you.

M. Brindley

Homes have never been able to look more stylish.

From inside...

...and outside.

Our expert technicians have been installing our security doors and other security products for our clients in a professional and timely manner for ten years.

All of our installation technicians have been thoroughly trained and certified in all aspects of installation.

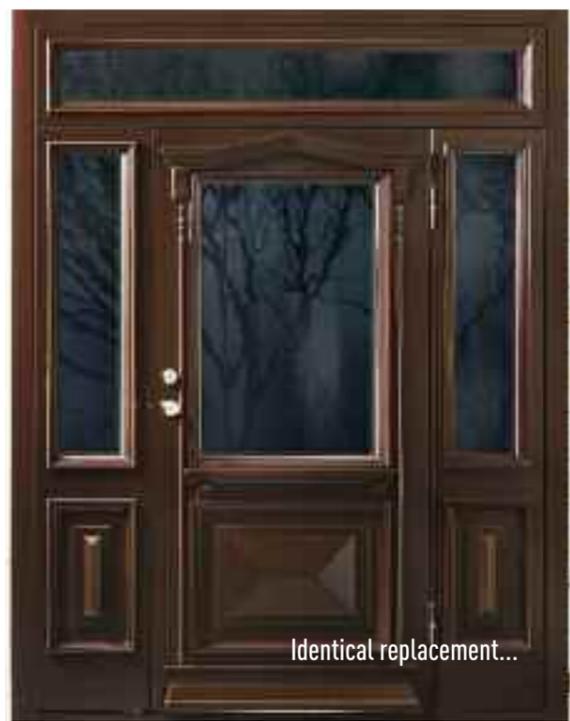

The best security door in the world is only as good as the installation job. That's why we use only the best technicians to fit our products in your home.

Windows and doors define the character of our buildings. It is now possible to improve your security without compromising on style.

Identical replacement...

...of an old and leaking front door.

Satisfied customer: 3
Thank you. You have done a nice job throughout this process.
Best wishes
Damian

Made to measure
arched doors meet all
customer security and
design requirements.

Satisfied customer: 4

Just a few lines to tell you that we are delighted with our new Impregnable Security door. It is a supreme-quality door which now makes our home feel like a fortress. The quality of customer service you provided all throughout was second to none, and the installation was hassle-free. It was a great pleasure doing business with your sales department and dealing with your friendly and professional fitters. I will definitely recommend you to others. Rarely in my life have I felt more satisfied with a purchase!

Kind regards,

Ismael Rionda – London NW9

You'll think your new door has always been there.
